MORESTUDIO

Company’s profile

Our Team, Our work and Our Passion

MORE STUDIO

Vision & Mission

Our guiding principles in building the future of software.

Vision

Let machines do what people don't want to. So people can do what they love.

Mission

We help business owners and large corporation bring back the time lost to admin and operations — so they can work on their business, not in it.

Our Milestones

Growth is important to us. We love tracking our progress so we know how far we have come and how far we need to go.

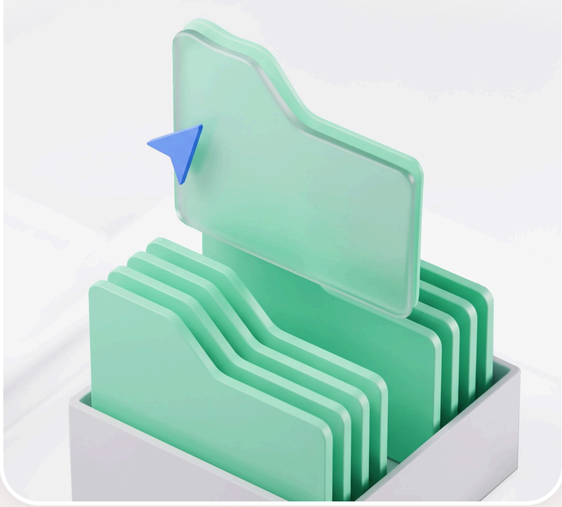
MORE STUDIO

Our AI Agents

Built for action, not just answers.

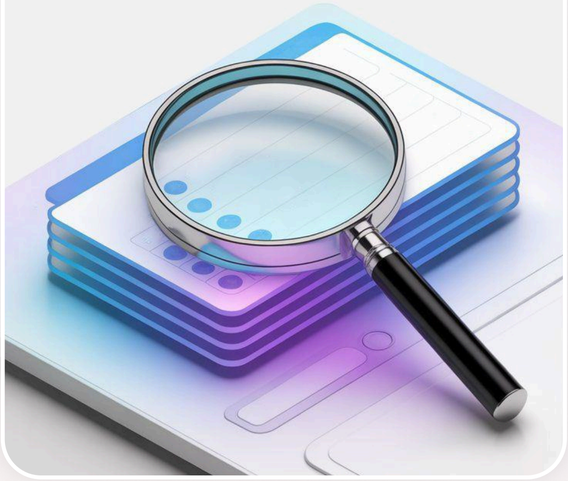
Profiling Agent

Automatically categorizes users by behavior, inputs, and history — ideal for personalized marketing or smart flows.



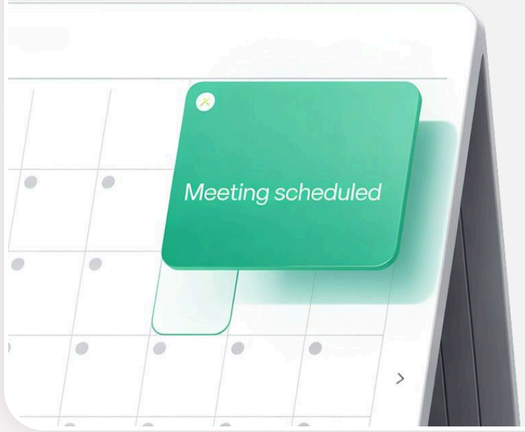
Search Agent

Understands user intent, handles typos, and delivers high-relevance results across products, services, or content.



Scheduling Agent

Finds the best time slots based on availability, preferences, and workload, reducing human coordination time.



Notification Agent

Delivers smart nudges, reminders, and alerts based on user behavior and key events.

More Product

Systems designed for precision and operational scale.

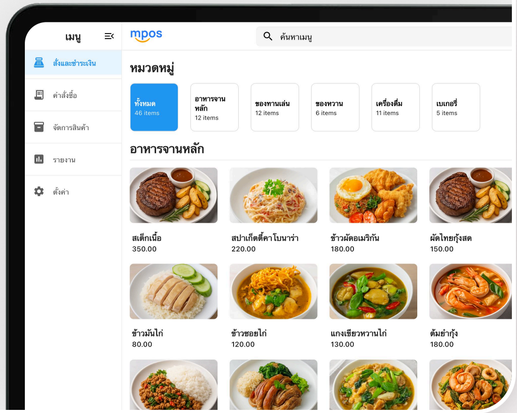
Consulta (Tele-Consulting)

Consulta is the software behind any business that runs on booked appointments with experts. Think: a customer needs help, books a time with a professional, pays, joins a video call, and keeps a record of what was discussed. That whole flow — from booking to payment to video to follow-up — is what Consulta handles.

We built it once, properly. Now we shape it to different industries.

คิดตัง (POS)

for business owners — A point-of-sale designed to disappear into the background, so owners run the shop instead of wrestling the system. On the roadmap: automated restocking (ordering ingredients and supplies through integrations with Modern Trades) and auto-calling for services (maintenance and cleaning), so the reordering and the service calls happen on their own, and the owner never has to stop to place them.

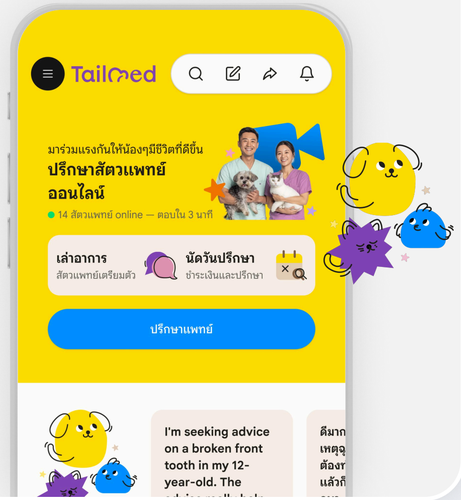


จองคิว (Booking System)

Automates the customer side of an inspection shop: it sends past customers their own digital reminders when they're due and books them back in through an integrated booking engine. The shop stops chasing customers and marketing itself, and just does the inspection.

TailMed

A communication platform connecting veterinarians and pet owners, so follow-ups and check-ins happen without either side living in their inbox. Vets spend their time on care instead of admin; pet owners get time back for what they love — including being with their pet.



MORE STUDIO

Our Service

More Studio takes you from idea to launch — we design it, build it, connect it, and make sure it works.

Design & Strategy

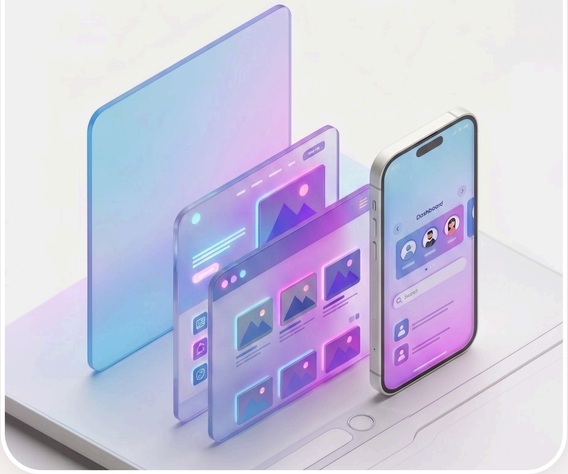
The plan and the look, before a line of code.

- UX/UI Design — clear, easy-to-use interfaces that fit your brand
- Consulting & Strategy — finding the right opportunities and planning the approach before you spend

Web & Apps

The product your customers see and use.

- Websites — from rapid modern builds (Vibe) to Custom or Template WordPress
- E-Commerce — online stores built to sell, with cart, checkout, and payments
- Mobile & Web Apps — custom-built around your business, with Maps, Payments, and API connections built in



Backend & Integrations

The engine underneath, and everything talking to each other.

- Backend Systems & Dashboards — the reliable behind-the-scenes, plus a control panel to manage your data and operations
- Business Intelligence — turn your data into clear reports and insights
- API Design, Development & Integration — build clean connections and plug in third-party tools
- Payment Gateway & LINE Integration (LIFF) — secure payments and services delivered right inside LINE
- Middleware — the translator that keeps different systems in sync

AI & Quality

Smarter products, launched with confidence.

- AI Integration — practical automation that cuts workload, cost, and errors
- QA & Testing — thorough testing across devices and real-world scenarios before launch

MORE STUDIO

Our Clients

In the last decade, our team has garnered industry trust through refined, professional solutions. Our expertise in insightful analysis, empathetic understanding, and innovative design consistently delivers exceptional results for all clients.

MORESTUDIO

PORTFOLIO

MORE STUDIO

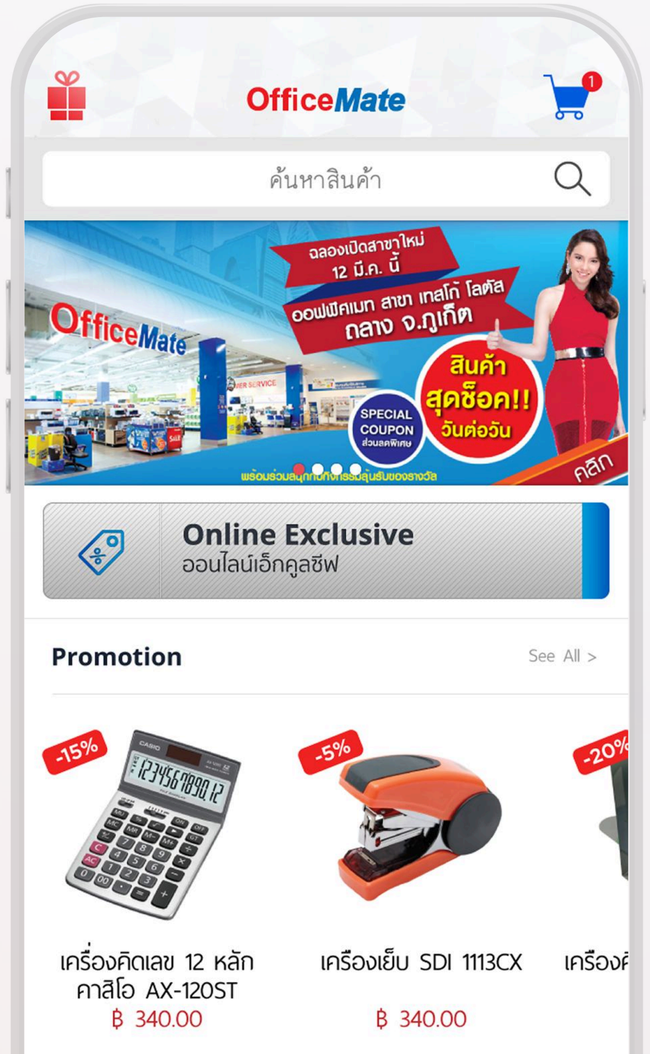
OfficeMate

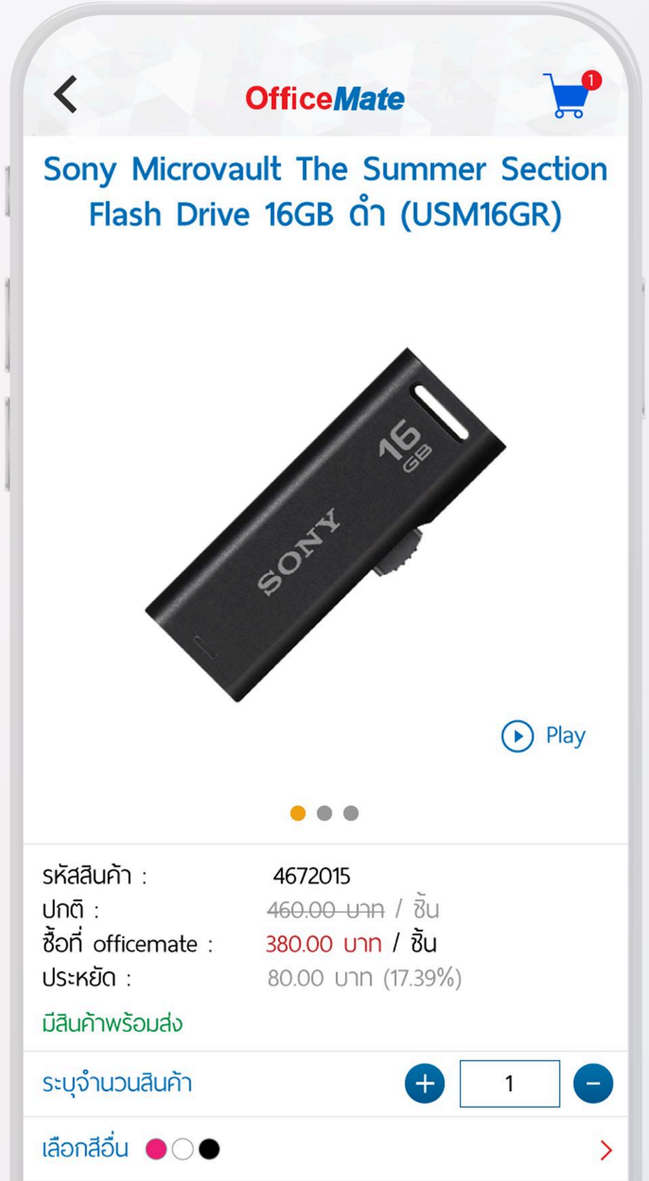
Office Mate

YEAR 2014

UX/UI Design | App Development

Designed and developed the OfficeMate e-commerce application from the platform's early days, delivering a seamless mobile shopping experience for both retail (B2C) and business (B2B) customers.





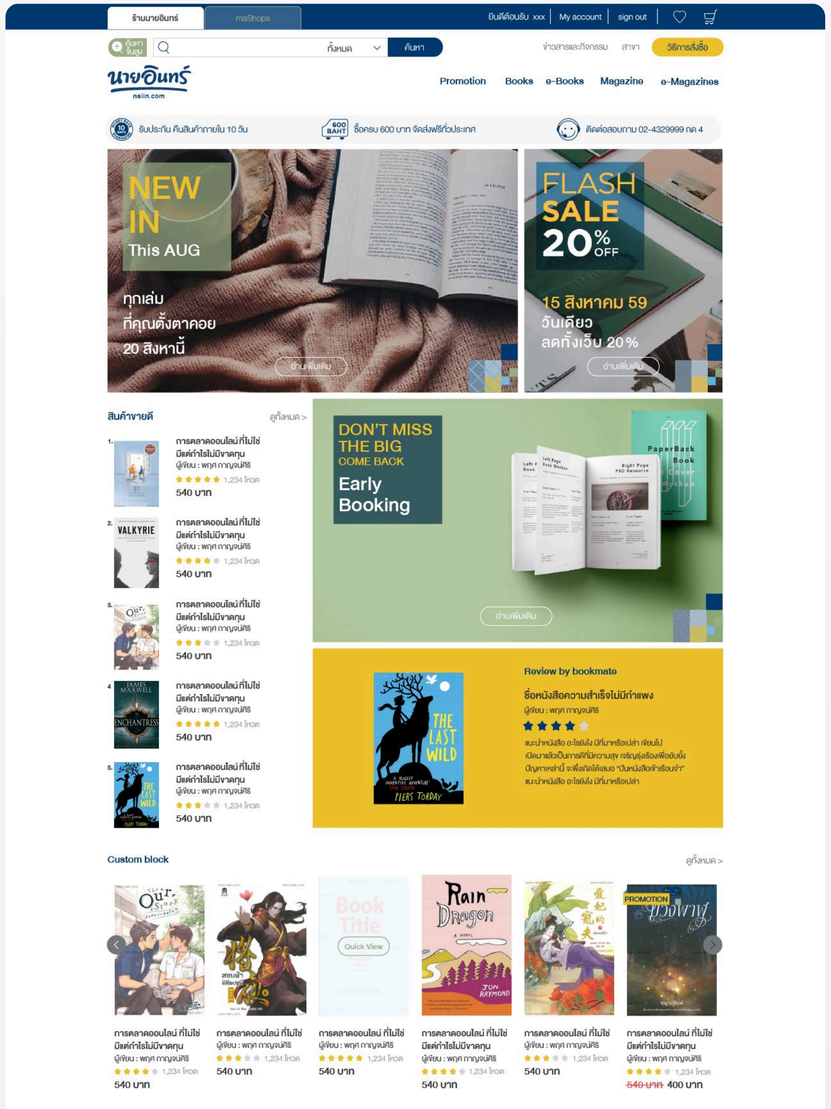
Naiin

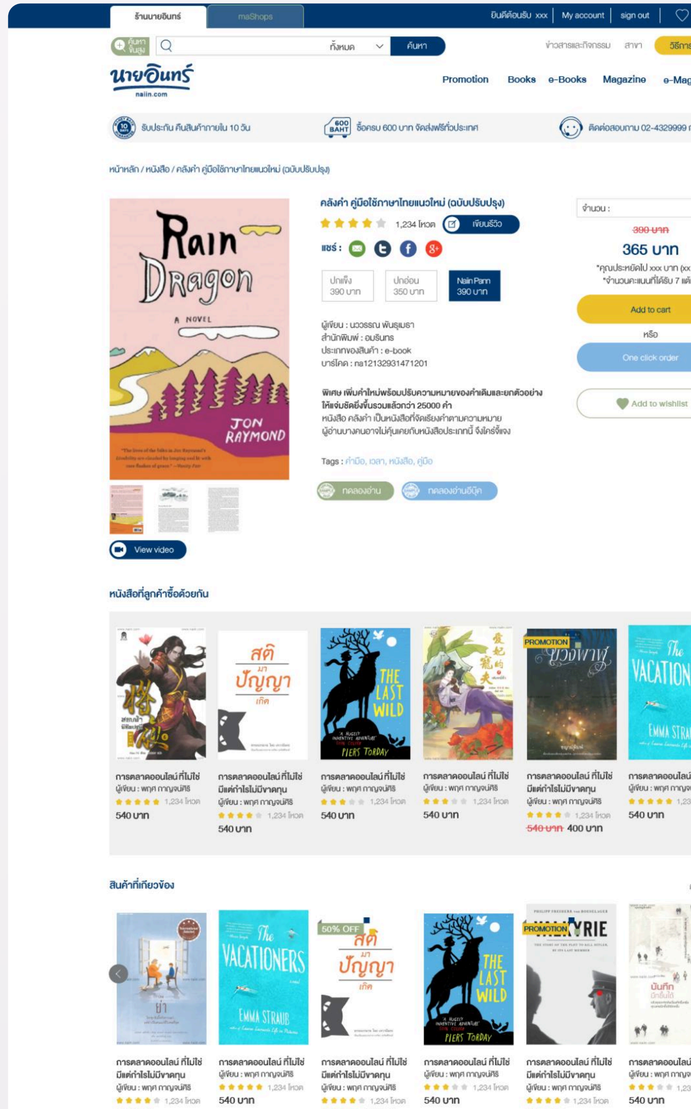
YEAR 2017

UX/UI Design

Web Development

Designed and developed the Naiin e-commerce website to deliver a seamless online book shopping experience. The platform enables customers to easily discover books, view product details and pricing, place orders, and track order status through an intuitive and user-friendly interface.





MORE STUDIO

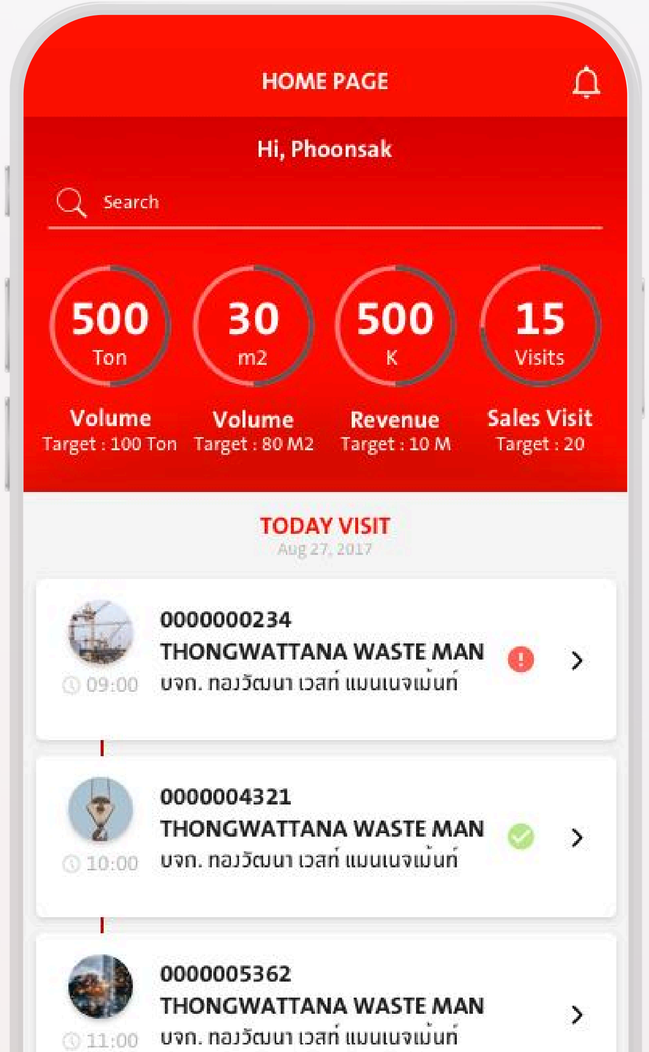
INSEE

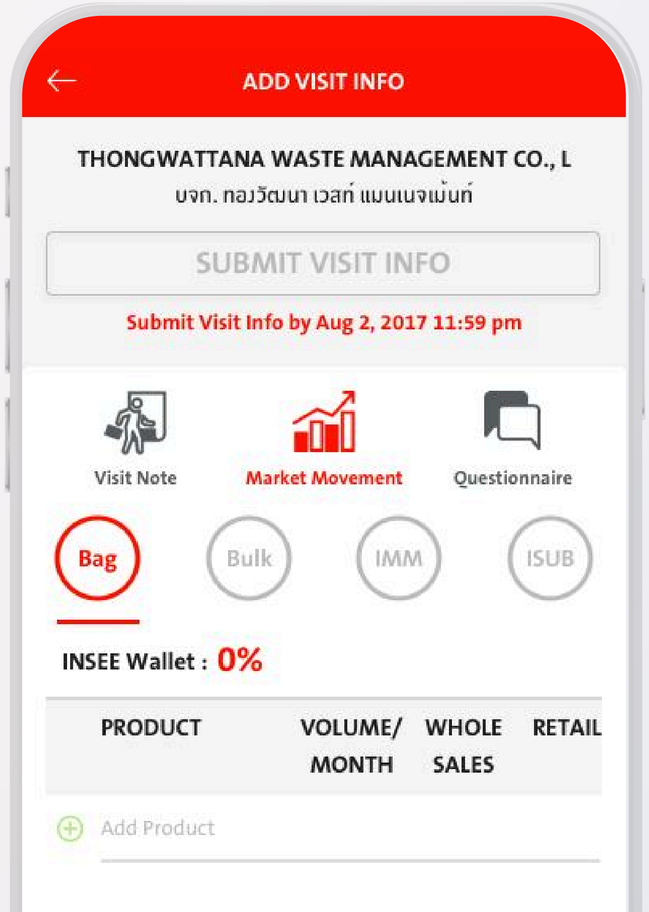
Insee

YEAR 2019

UX/UI Design | App Development

Designed and developed a sales force application for Siam City Cement (INSEE) as part of the project team. The solution streamlines field sales operations with customer check-ins, appointment scheduling, on-site reporting, order and case management, progress tracking, and real-time dashboards for sales and performance monitoring.





MORE STUDIO

HomePro

Part of the HomePro

YEAR 2019-2026

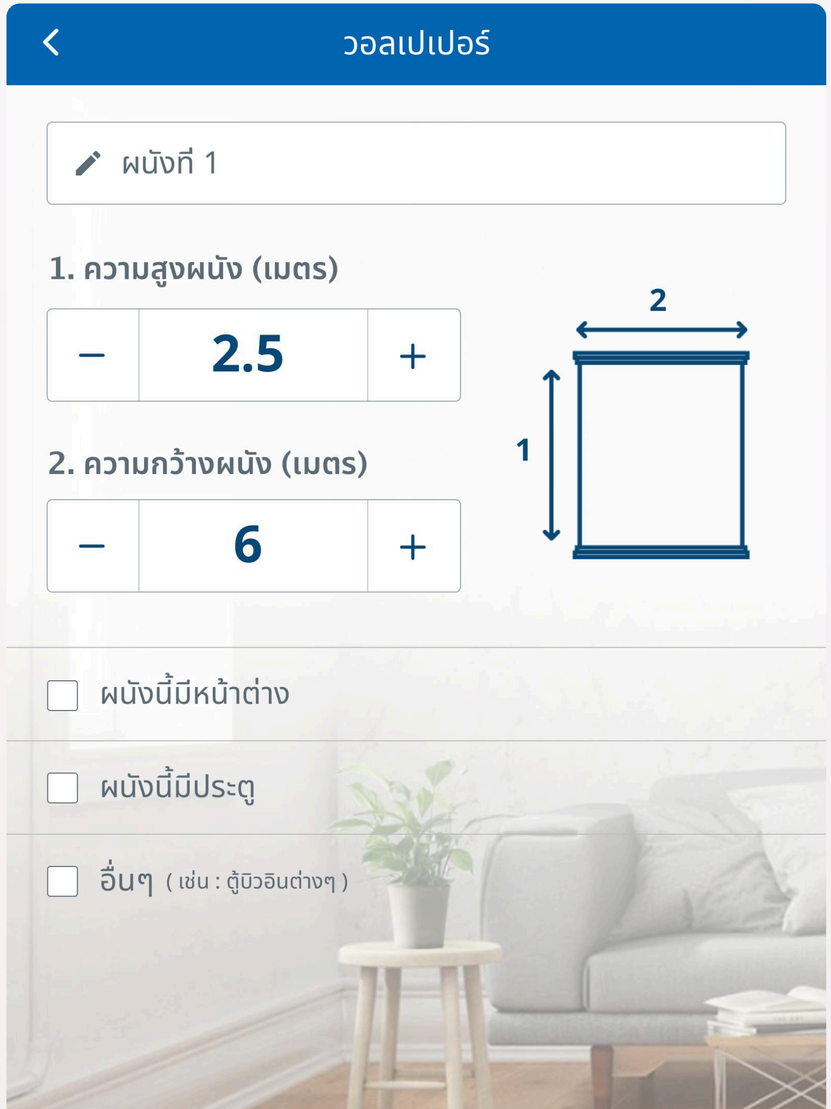
Optimizing customer experiences for such a customer centric firm has been one the greatest lessons and experiences for our team.

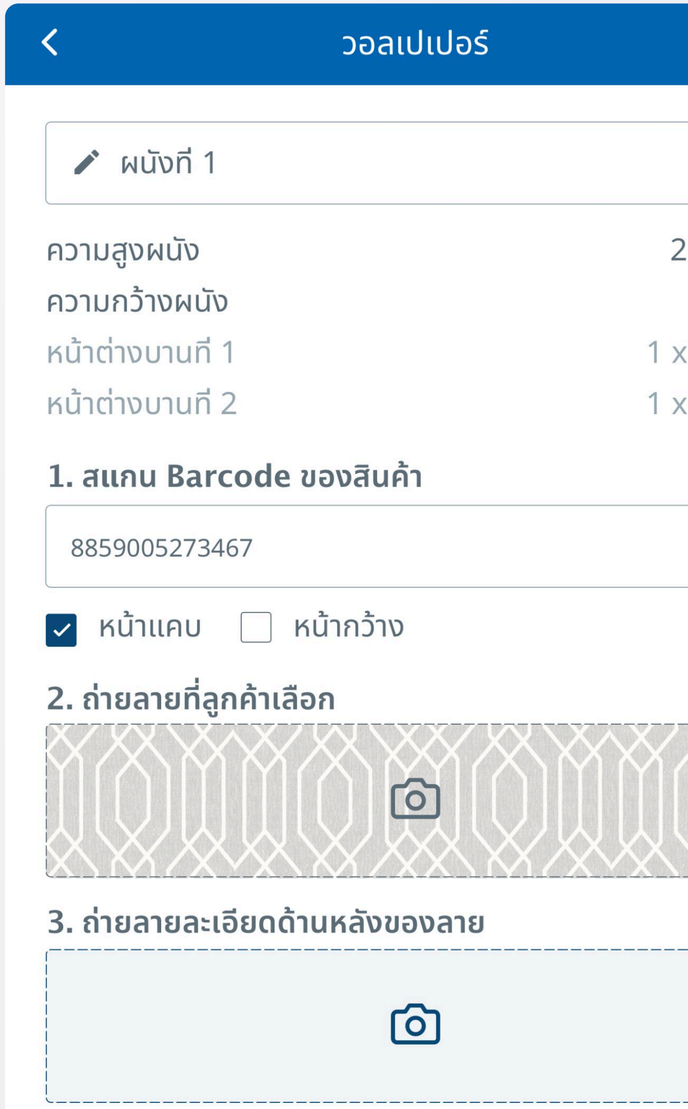
HomePro - Estimator

YEAR 2019

UX/UI Design | App Development

Designed and developed the Estimator application for HomePro to help sales staff and customers calculate custom curtain tailoring costs in-store. The app enables sales representatives and customers to generate accurate price estimates based on specific requirements, including curtain dimensions, installation methods, and fabric types, making the pricing process faster, easier, and more accurate.





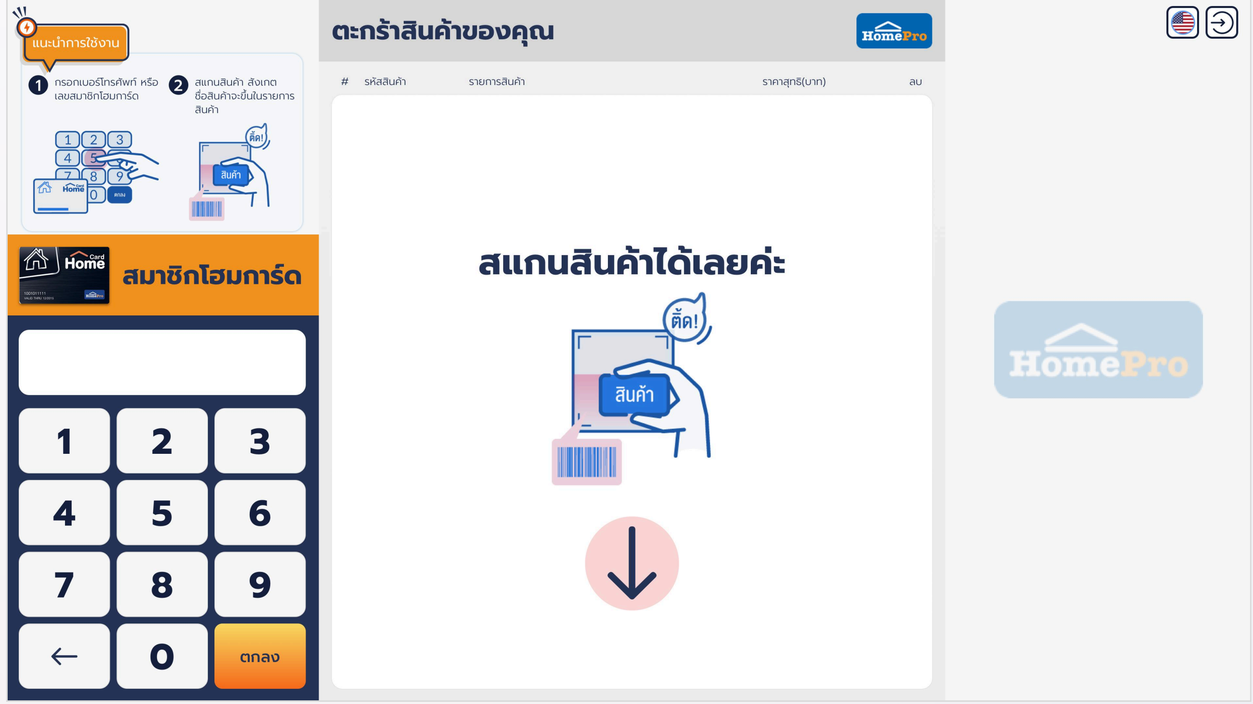
SELF CHECKOUT BY HomePro

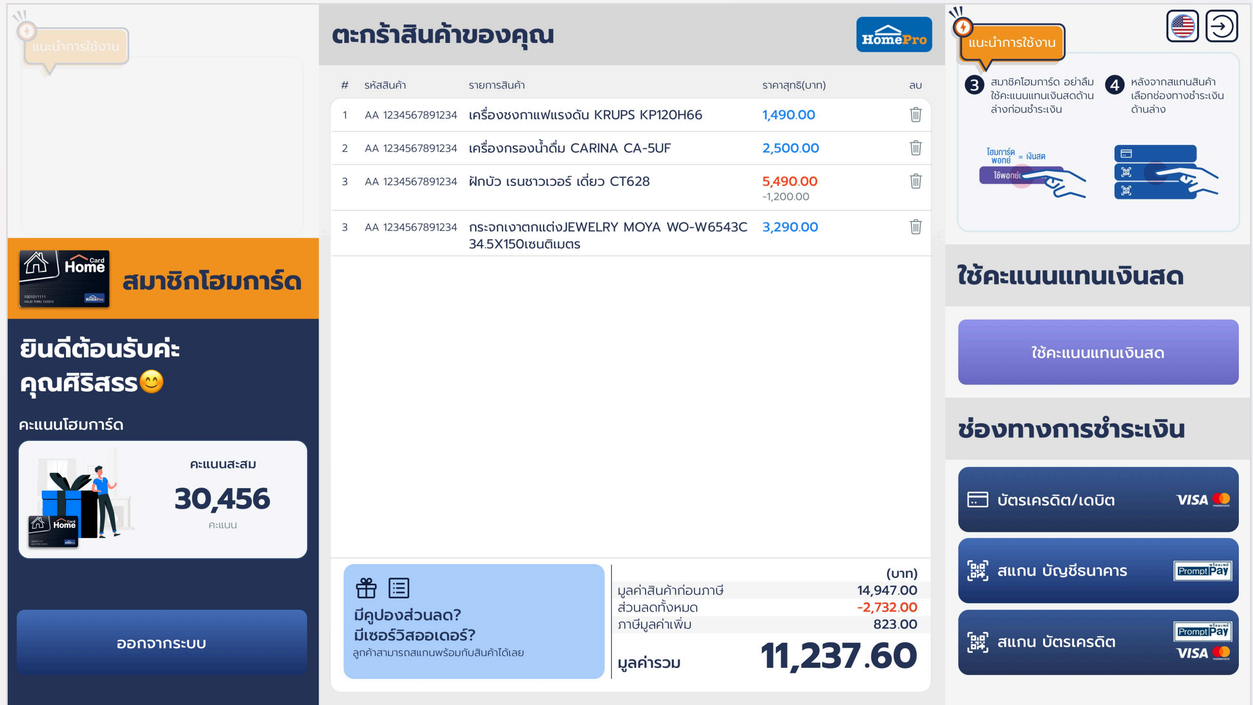
HomePro - Self Checkout

YEAR 2019

UX/UI Design

Designed the user interface for HomePro's Self Checkout system, enabling customers to complete their purchases independently at physical store locations. The system supports product price calculation, multiple payment methods, and loyalty points redemption and accumulation. The interface was designed to deliver a fast, seamless, and intuitive checkout experience through a streamlined process completed in just a few screens.





Chang by HomePro

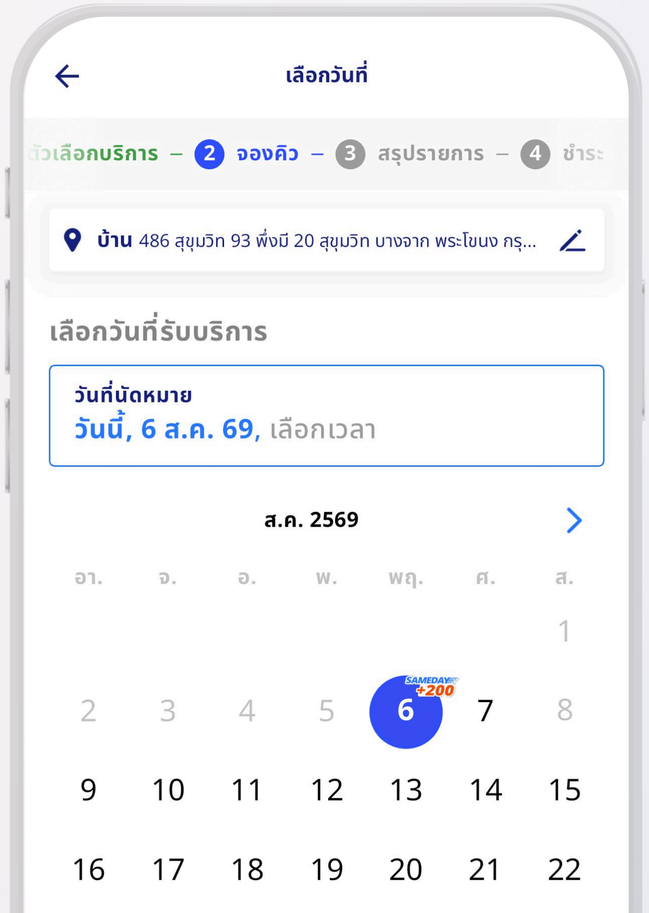
YEAR 2020 - 2026

UX/UI Design

App Development

Designed and developed the Home Service app, an all-in-one platform for home maintenance service booking. The app enables users to browse services, book appointments, make payments, and track service requests, while being built to support a growing system and a large-scale user base.

The product has since evolved into Chang by HomePro, where I have continued to design and refine the product's User Interface (UI), enhancing usability and supporting the introduction of new features.



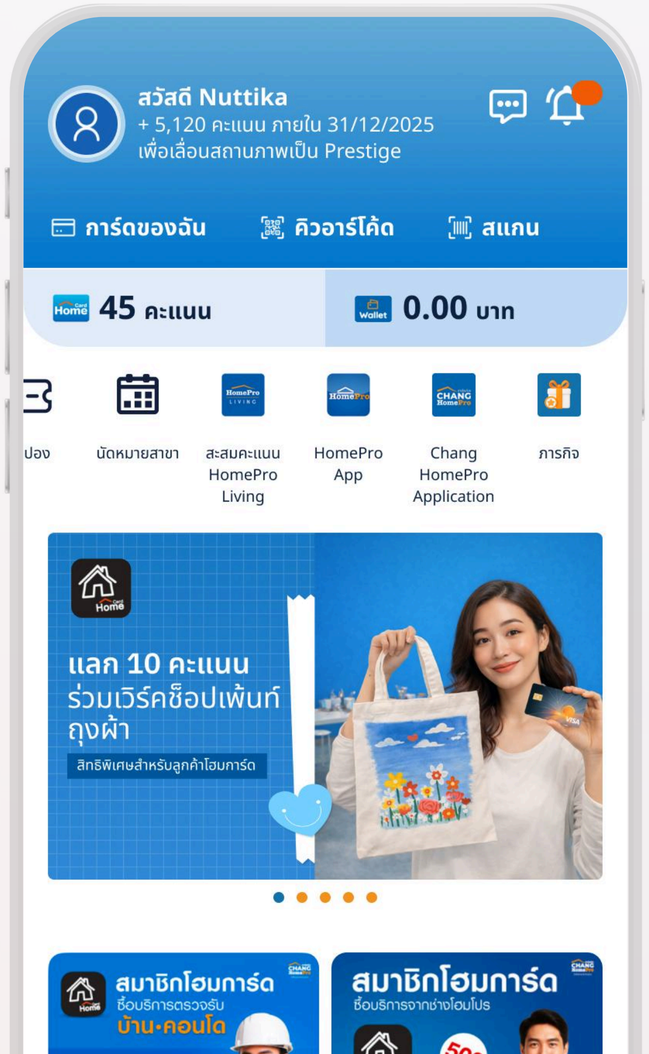
HomeCard

YEAR 2020 - 2026

UX/UI Design

App Development

Designed and developed the HomeCard app, a customer loyalty platform that enables users to earn and redeem reward points, access exclusive privileges, claim coupons and discounts, complete missions, and manage promotional benefits in one place. The app was designed to support a growing user base and a scalable system, with continuous product enhancements and feature improvements to evolve the user experience over time.

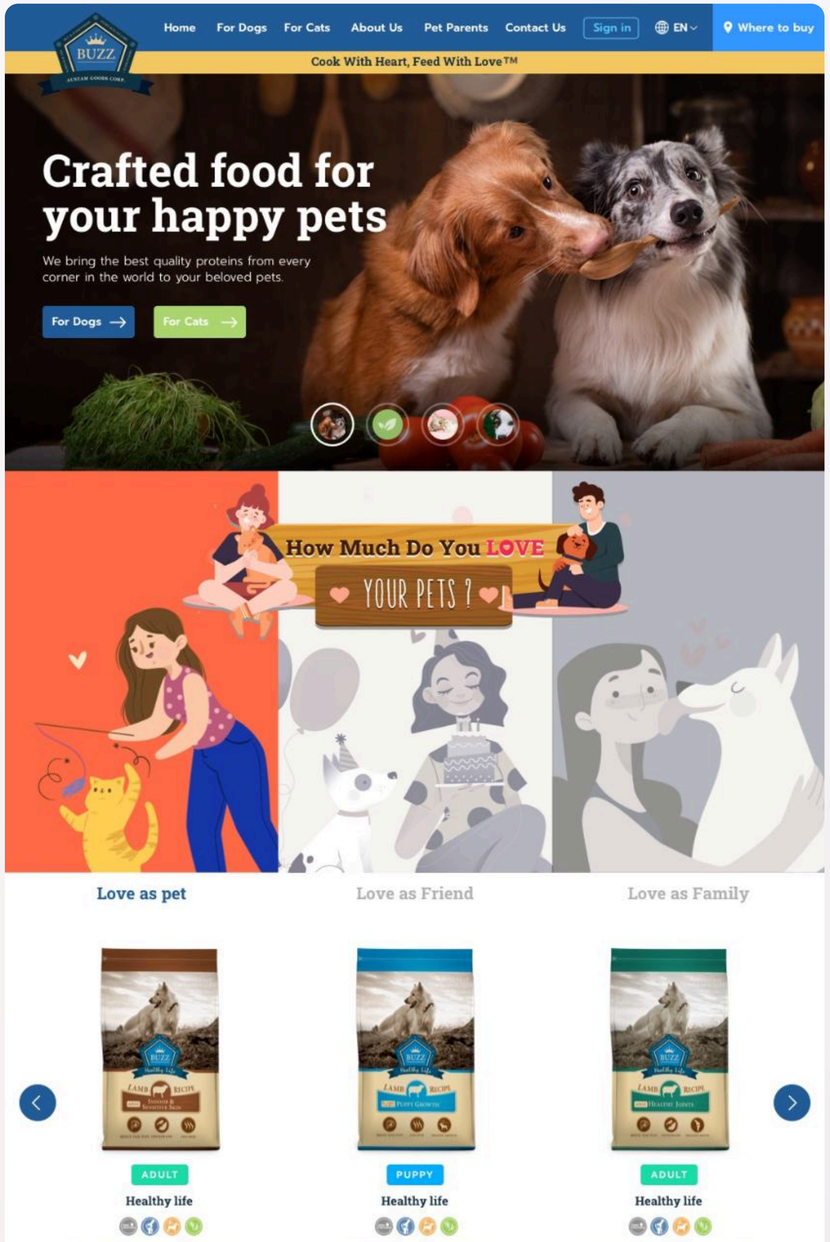


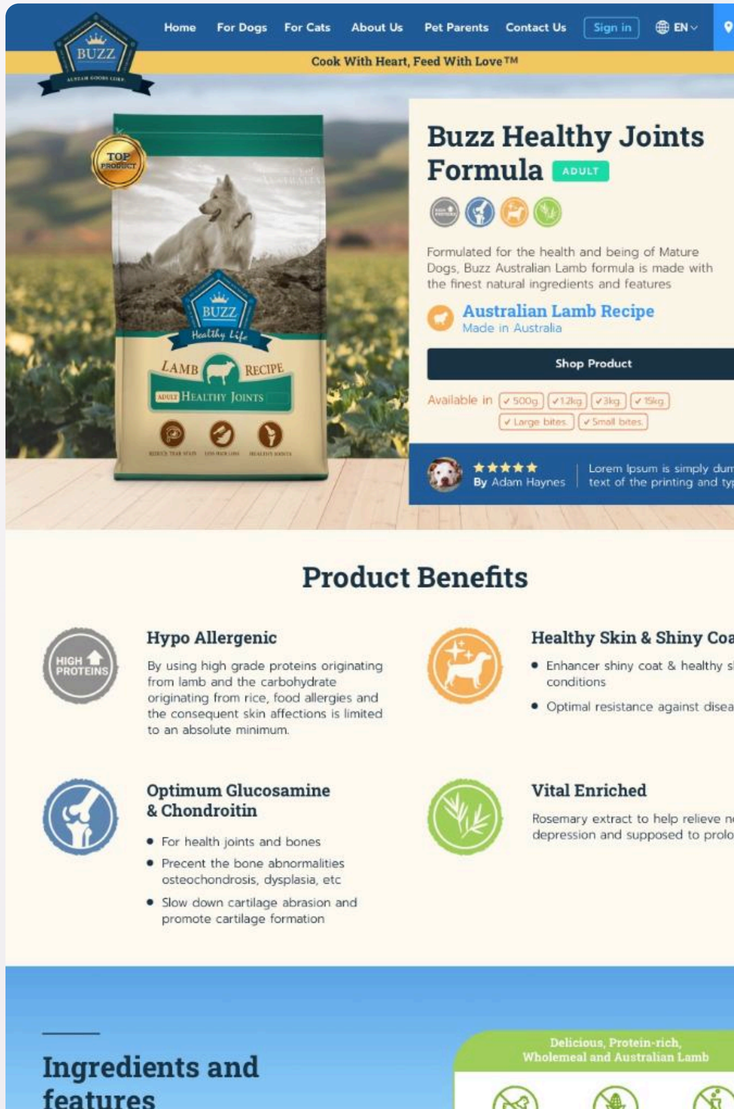
Buzz Pets Food

YEAR 2020

UX/UI Design | Web Development

Designed and developed the website for Buzz Pets Food to showcase the brand's complete range of pet food products across multiple categories. The website provides detailed product information, ingredients, and nutritional insights tailored to pets' needs. It also features brand updates and educational content about pet care, helping customers easily access product information and useful resources for their pets.



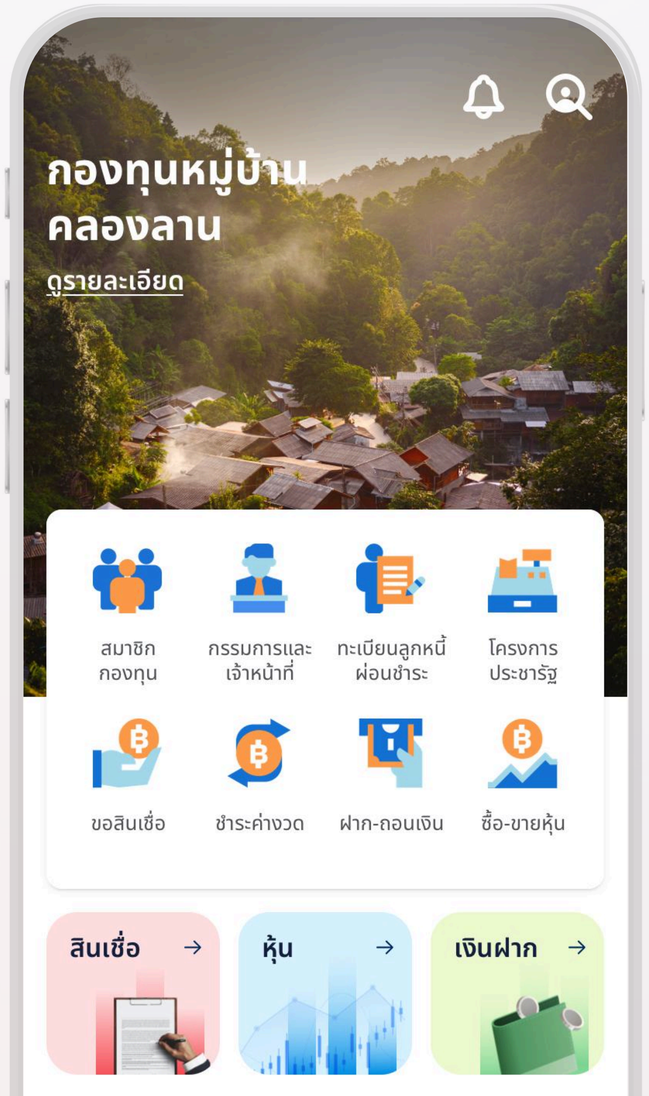


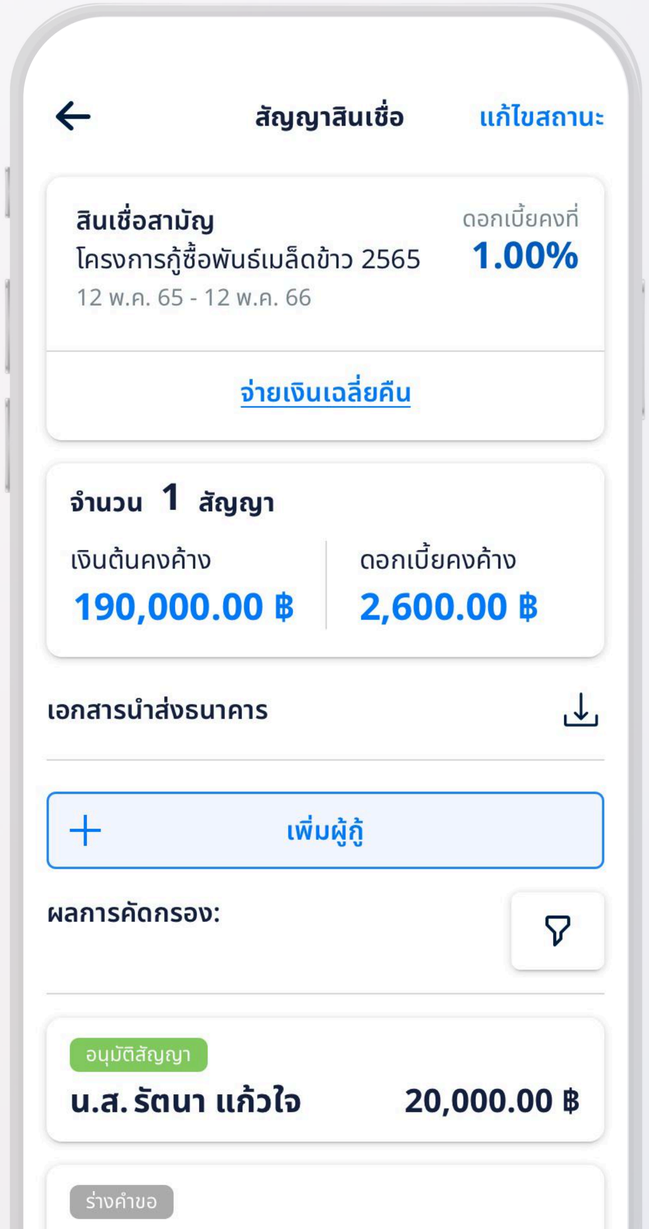
Village Fund

YEAR 2022

UX/UI Design | App Development | Data Management | Power BI

Embarked on an innovative project to digitalize the Village Fund office, crafting a digital platform that simplifies financial transactions and management for villagers in Thailand, many of whom are senior citizens with minimal technological exposure. The project centered on developing a user-friendly mobile application tailored to the needs of villagers and village leaders, overcoming challenges related to financial literacy and technological reluctance.





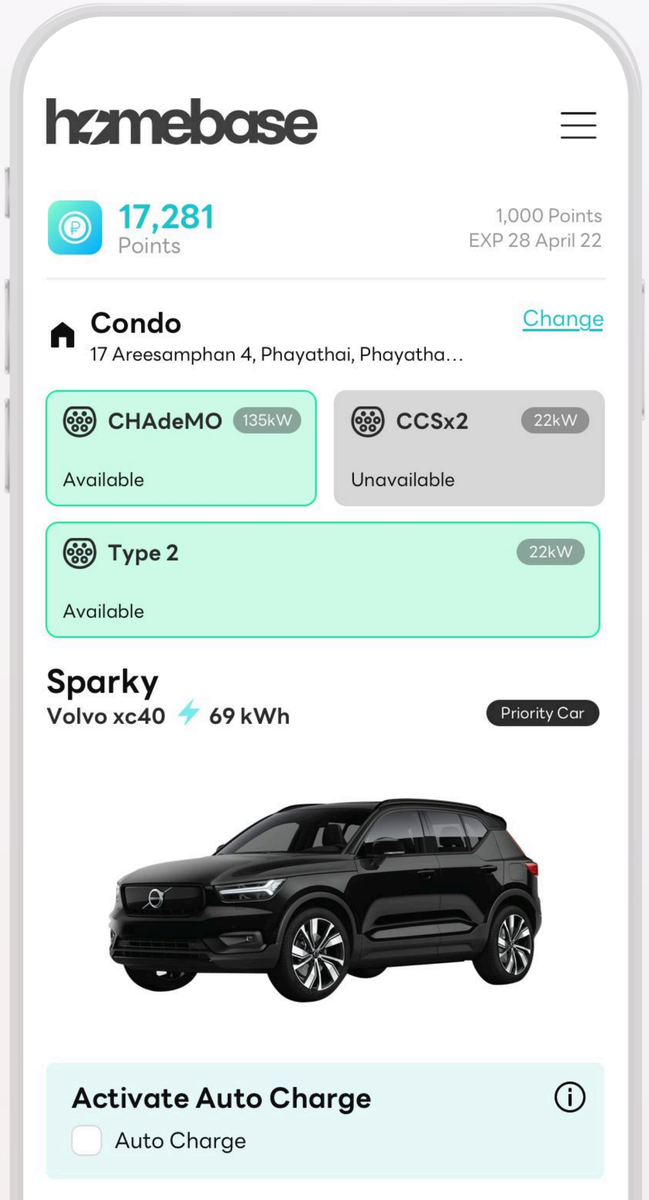
MORE STUDIO

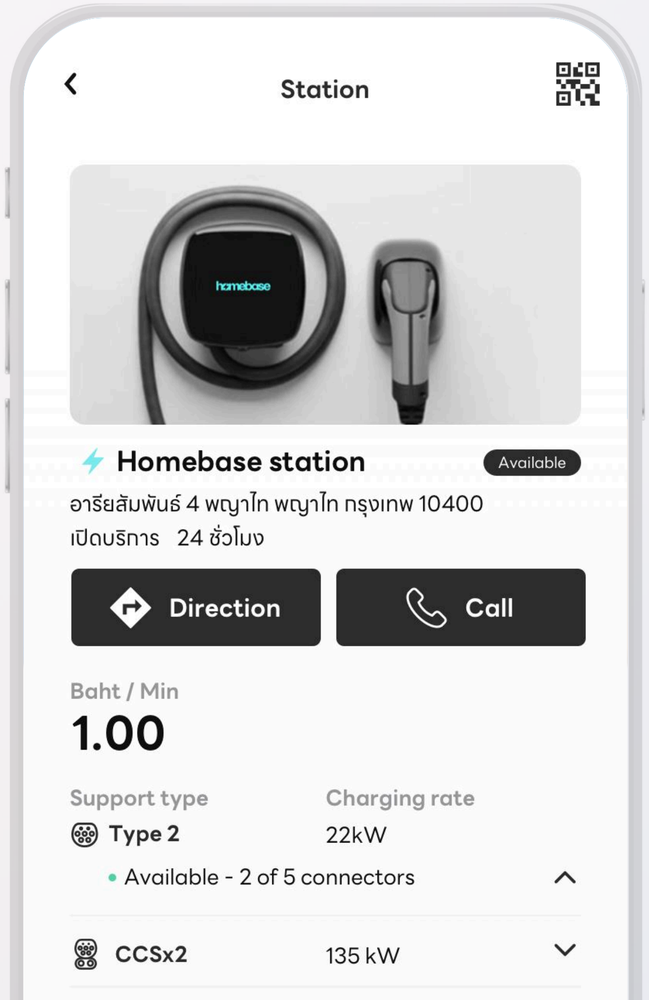
Homebase

YEAR 2023

UX/UI Design | App Development

Homebase stands at the forefront of the electric vehicle (EV) revolution, committed to combating climate change by facilitating the widespread adoption of EVs. Our mission is to integrate EV charging into the fabric of daily life, ensuring it is as straightforward and habitual as charging a smartphone.





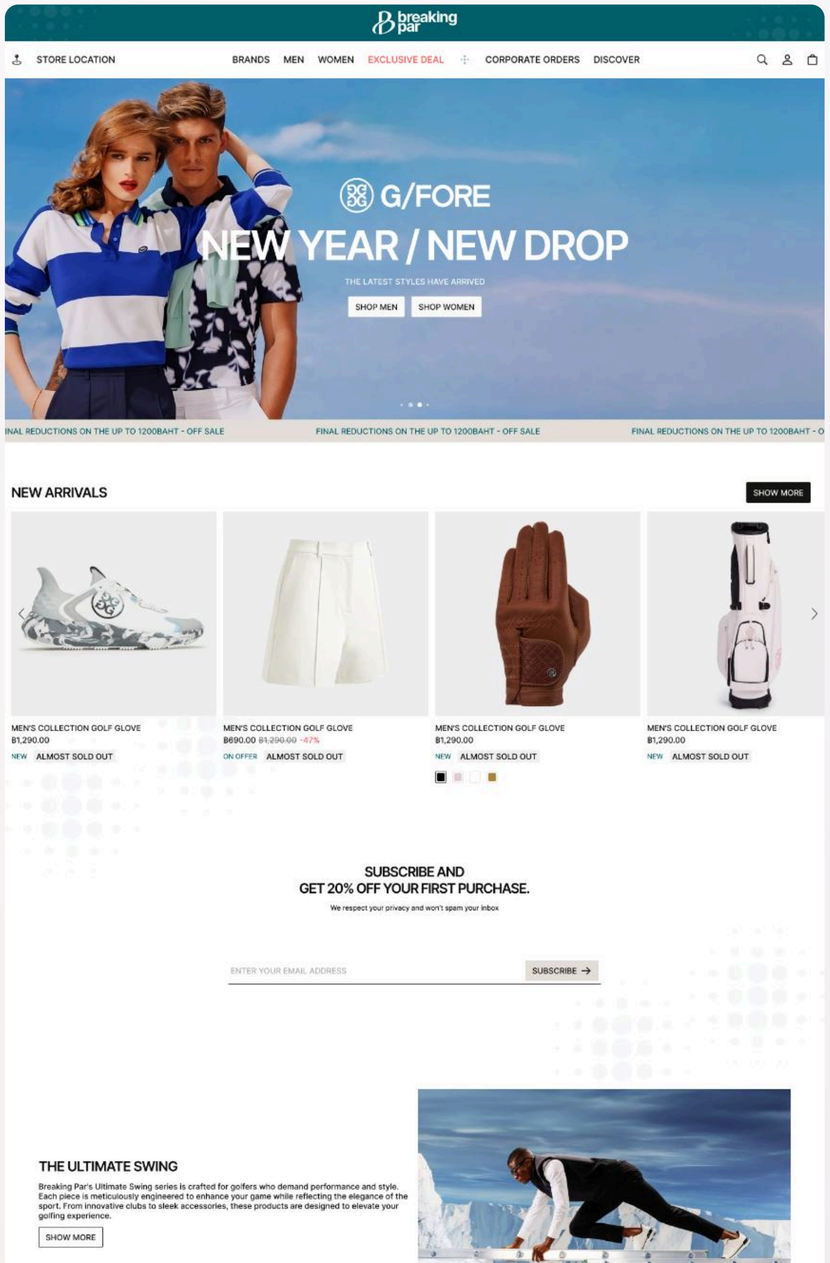
Breaking Par

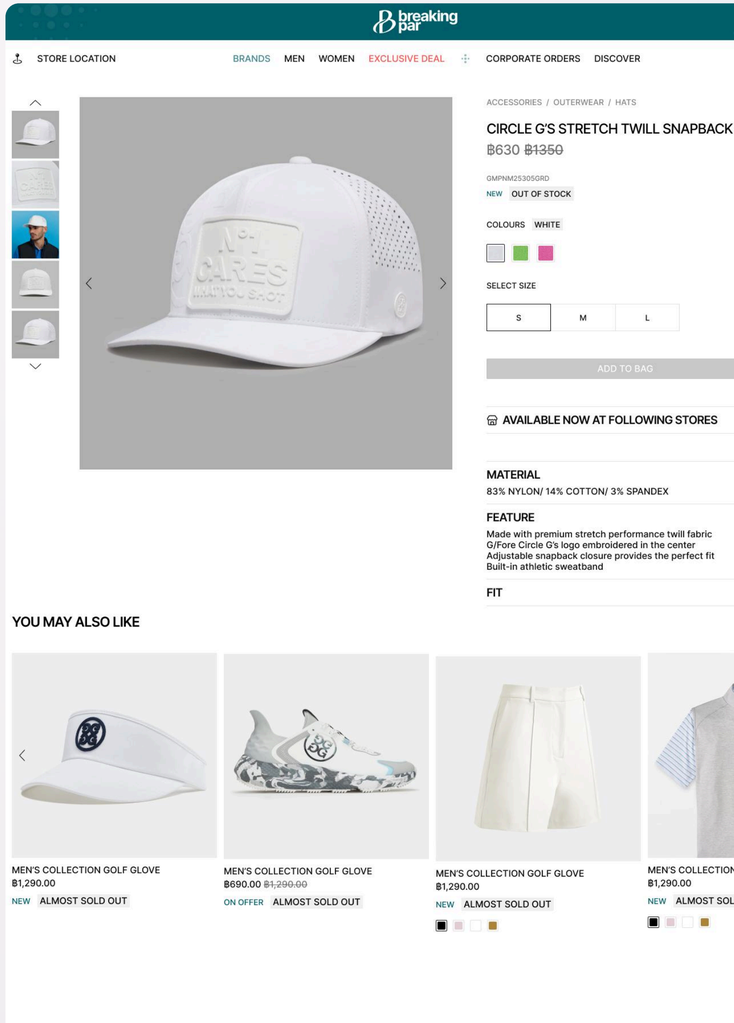
YEAR 2025

UX/UI Design

Web Development

Designed and developed the e-commerce website for Breaking Par, a sports fashion brand, to deliver a seamless and convenient online shopping experience. The platform enables customers to easily discover products through clearly organized categories, view product details and pricing, place orders, and track order status through an intuitive and user-friendly interface.





MorePOS

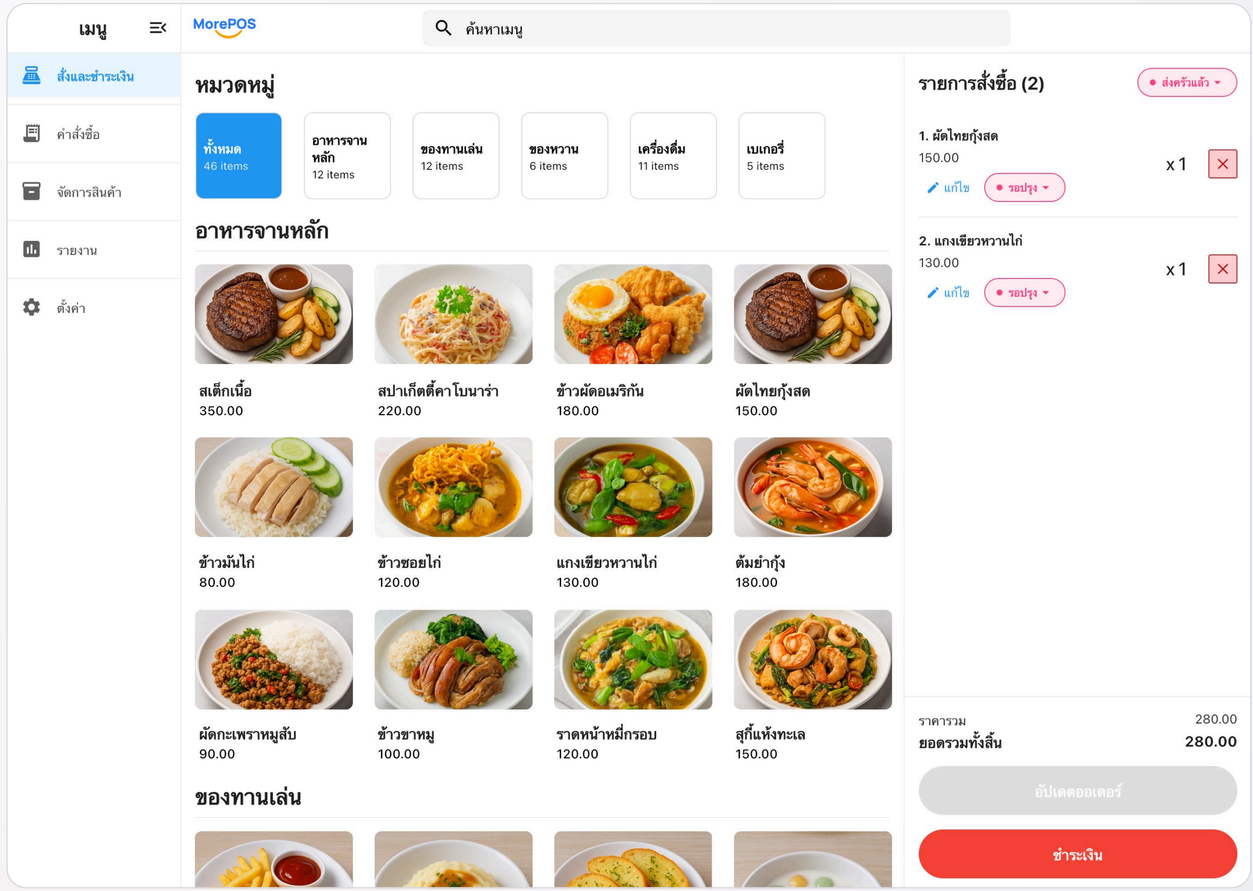
Ready-to-Use Product

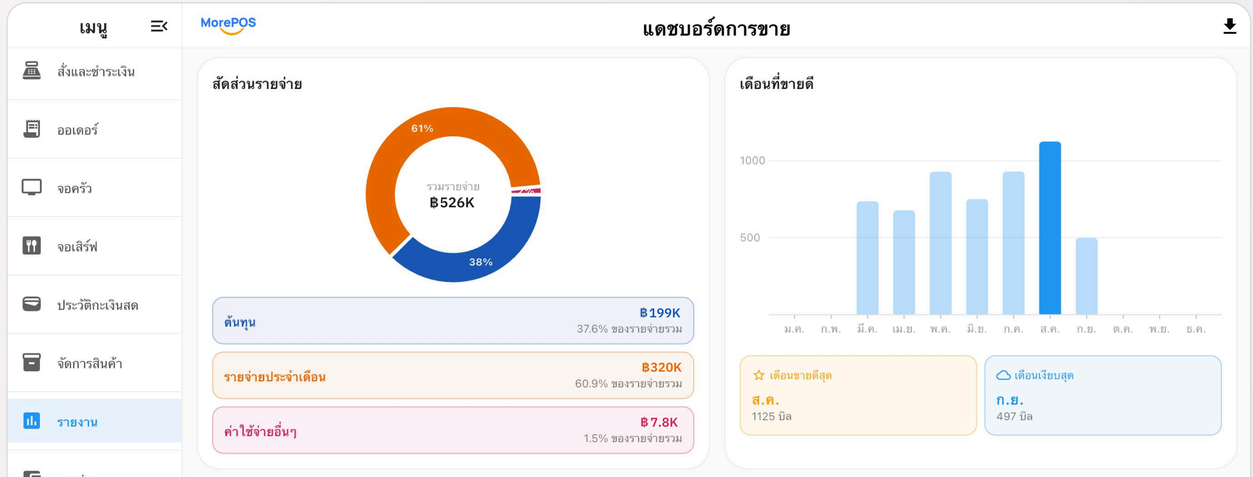
MorePOS

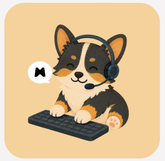
POS App

MorePOS is built for business owners,
A point-of-sale designed to disappear into the background, so owners run the shop instead of wrestling the system.

On the roadmap: automated restocking (ordering ingredients and supplies through integrations with Modern Trades) and auto-calling for services (maintenance and cleaning), so the reordering and the service calls happen on their own, and the owner never has to stop to place them.







Ready-to-Use Product

Bacon AI Assistant

AI Assistant

Bacon is an AI assistant on LINE OA that streamlines daily HR and administrative tasks, including leave requests, approvals, late arrival reports, company announcements, and supply requests, all within LINE, with no additional app required.

On the roadmap: Monthly Reports summarizing leave, late arrivals, and absences, with instant Excel export to reduce manual HR workload.

TECH PLUS
TRO Management System
ครบทุกขั้นตอนสำหรับธุรกิจตรวจสภาพรถ

MORE STUDIO

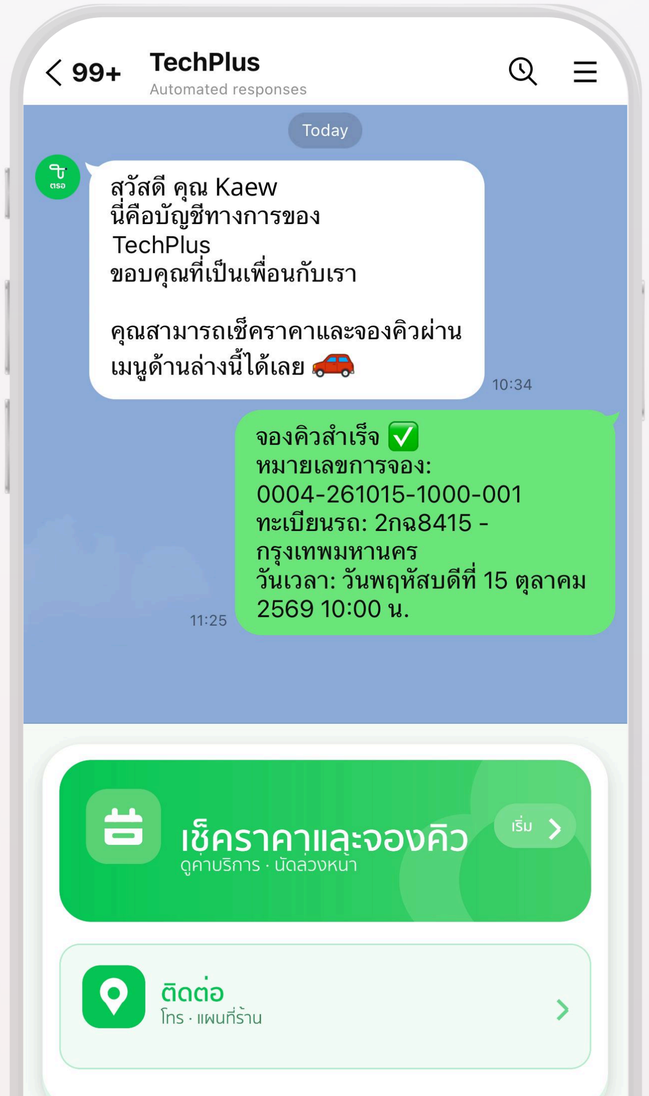
Ready-to-Use Product

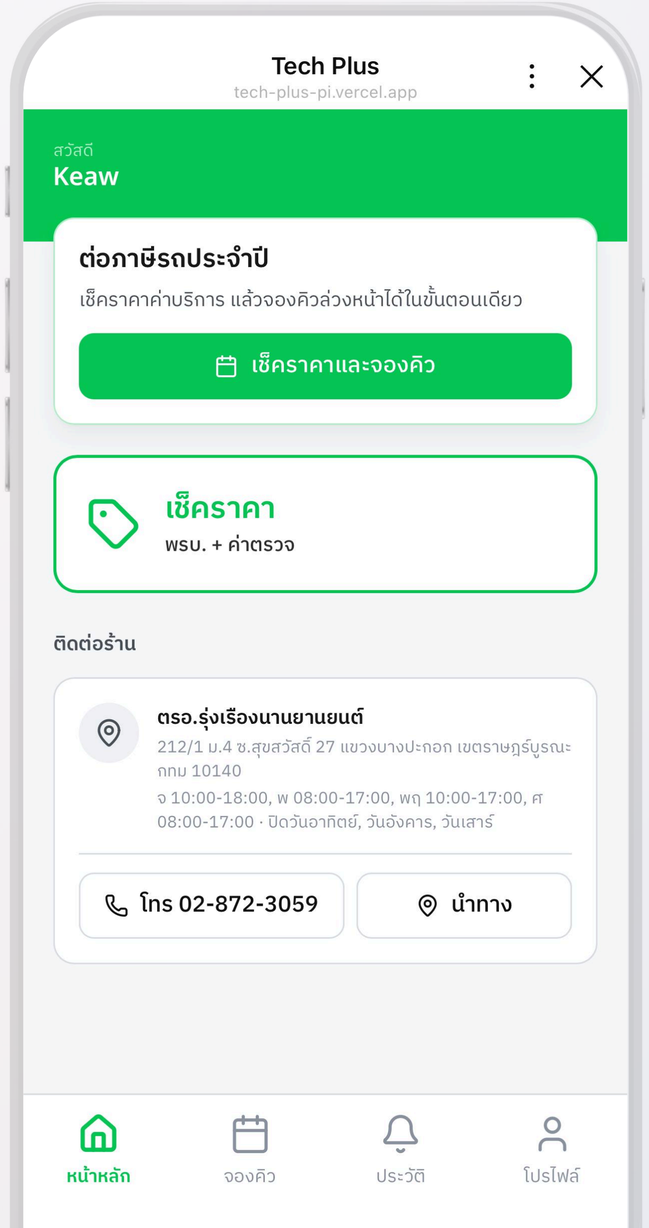
Tech Plus

TRO Management System

Tech Plus is an all-in-one management system for private vehicle inspection centers in Thailand. Customers can check prices, book appointments, and receive vehicle tax renewal reminders through LINE, while customer records and appointments are managed systematically.

The back-office system enables business owners to manage appointments, customer databases, key business information, and revenue through a dashboard, while overseeing multiple branches in one place. This streamlines daily operations and improves overall efficiency.

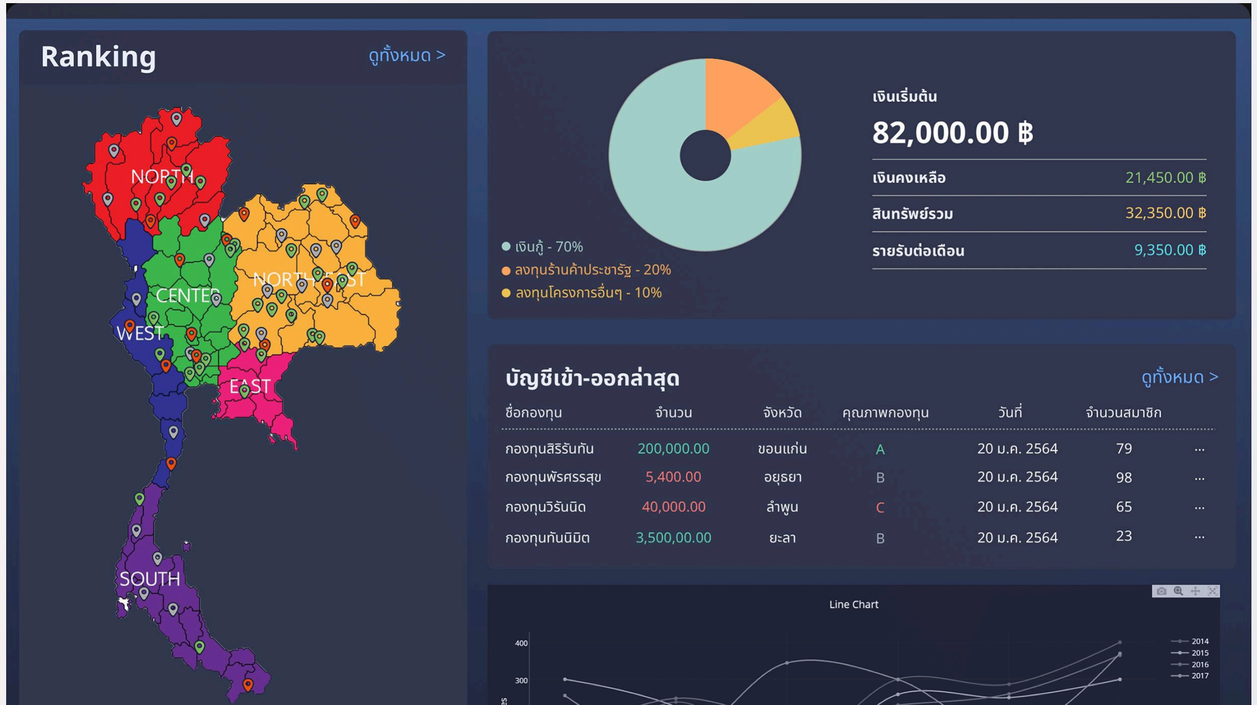




Dashboard

Data Management

Morestudio designs and develops comprehensive dashboard and data management systems for businesses across various industries. From structured data management and key metric visualization to business performance analytics, our solutions help businesses gain clear insights, streamline operations, and make informed decisions.



UX UI

UX/UI Design

Morestudio designs user experiences (UX) and user interfaces (UI) for a wide range of digital products, focusing on user needs, usability, and business goals. Our approach simplifies complex processes, creates seamless experiences, and helps users accomplish their goals with ease and efficiency.
